 Vinnytsya

## Skills

- CSS, SASS
- HTML
- BEM
- JavaScript
- Vue
- PINNIA
- GIT, GitHub
- VUE ROUTER
- REST API

## Education

• Bachelor of Software Engineering  
*Vinnytsya National Technical University* Sep 2022 - Jun 2026

• Frontend developer Apr 2024 - Oct 2024

## Experience

### • Pet- project: Spotify Clone

• Description: Developed a web application for music with functionality similar to Spotify.

Technologies: Vue.js, Spotify Web API, HTML, CSS, SCSS, JavaScript

#### • Features

- Search for tracks, albums, and artists.
- Playback of music tracks with minimal artist information display.
- Integrated music player with track-switching functionality to Spotify
- Responsive design for various devices.

• Result: Created an interactive application showcasing basic features of a music streaming platform and integration with Spotify Web API. The project allows users to search for music, view artist information, and play track through a custom-built player.

### • Test Task

• Description: This website is a one-page educational resource designed to test the user's knowledge in an interactive format. The project was implemented as a test task. The platform allows you to search for the necessary materials and register to receive other information.
